**FLORENCE-DARLINGTON
TECHNICAL COLLEGE
1992**

EDUCATION THAT WORKS

TECH

Dr. Michael B. McCall, President

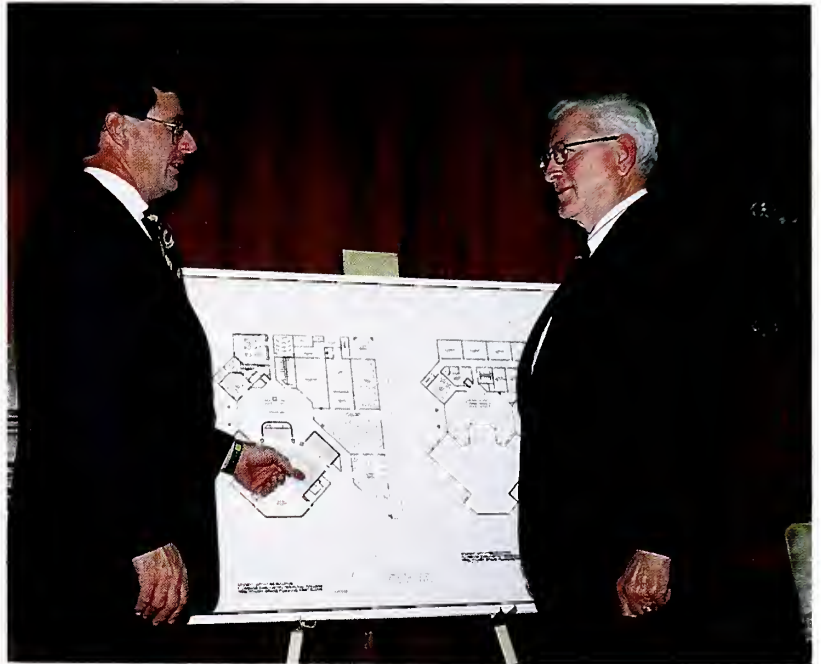

LEADERSHIP

AREA COMMISSION

Dr. McCall discusses plans for a future student center with Mr. Howard Gandy, Chairperson, Area Commission.

Area Commission L-R — Julius Lighty, Clarissa M. Williams, Goz. G. Segars, Howard L. Gandy — Chairperson, Thomas R. Perrin, Erwin Paxton, Marian W. Hunsaker, Alvin E. DeWitt. Not Pictured: R. Bryan Harwell, R.B. Scarborough.

SOMETHING FOR

ACTIVITIES

EVERYONE

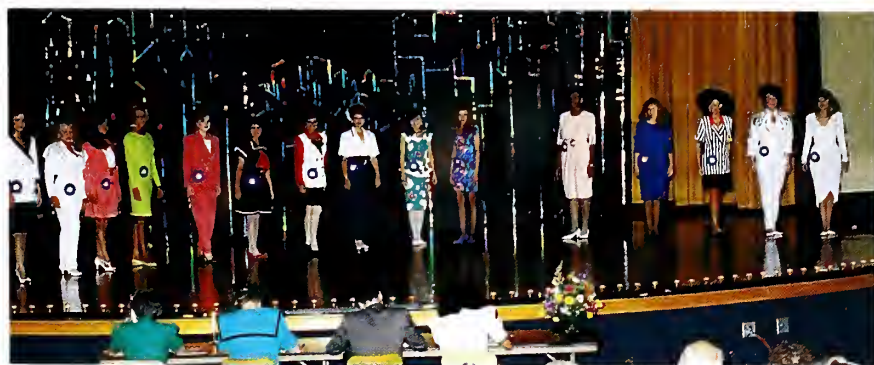

MS. TECH PAGEANT — 1991

Those with special recognition were from L-R: Stacey Cantley: Miss Congeniality, Karla Taylor: 2nd runner-up, Michelle Sturkie: Ms. Tech 1991, Amy Geddings: 1st runner-up.

Ms. Tech, Michelle Sturkie with President Michael B. McCall.

Ms. Tech contestants model their casual wear for the judges.

Michelle Sturkie represents FDTC in the Southern 500 parade.

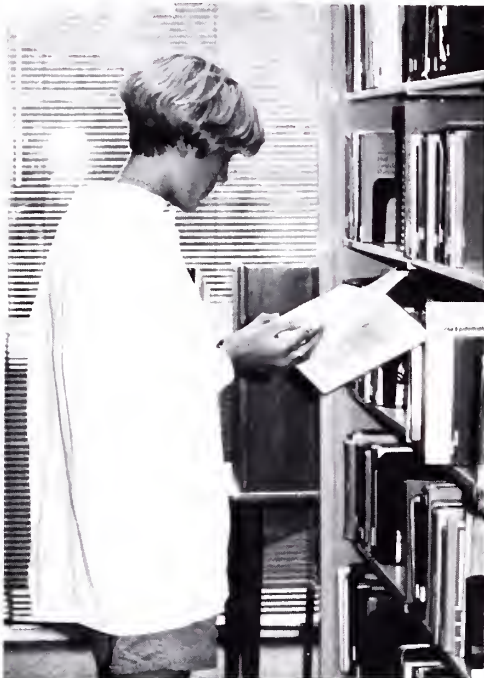

Five finalists pose for the final judging.

ACADEMICS

ASSOCIATE OF ARTS/SCIENCES

How are we ever going to put this thing back together?

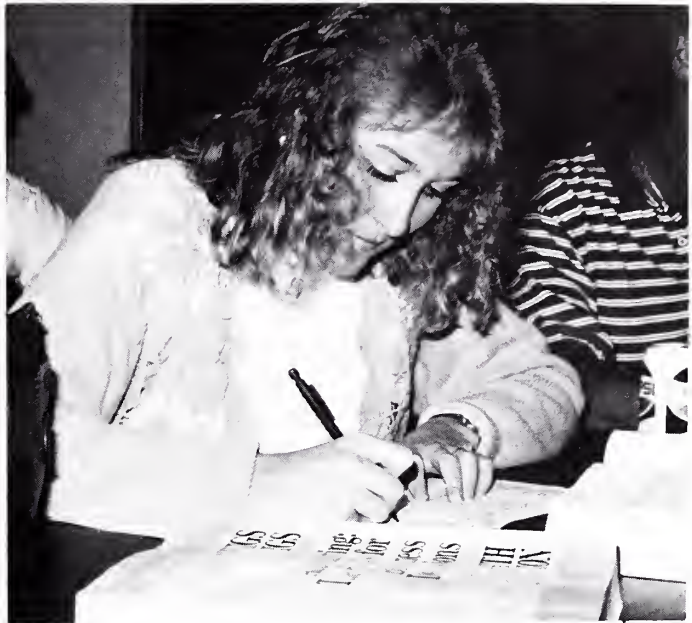

Where did I hide that money?

Hey, look what I found!

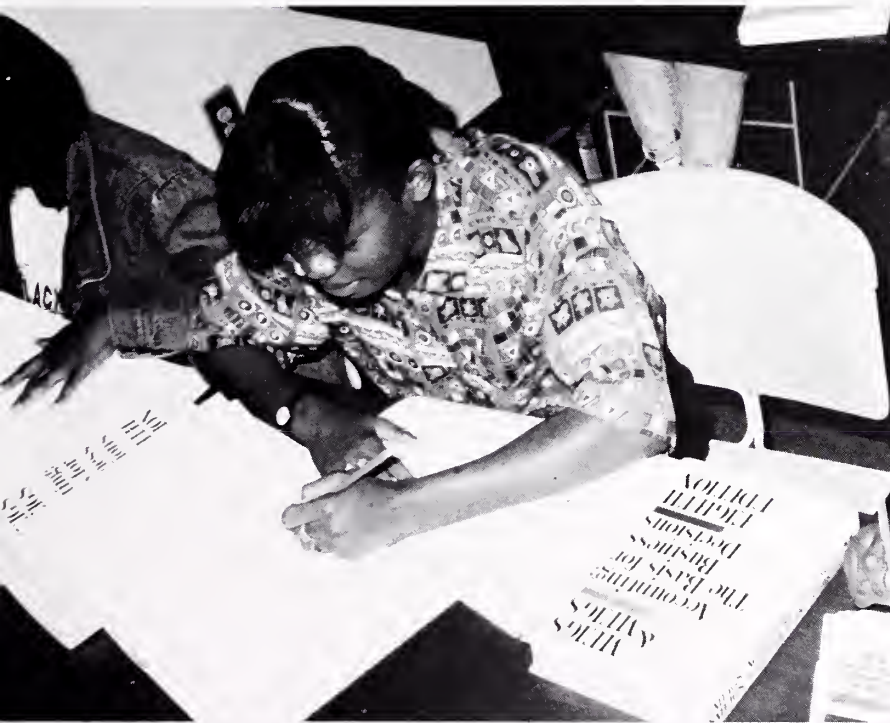

Catch the Spirit with the cast of "Godspell".

ACCOUNTING

I can't believe he makes that much money!

One of these calculators is wrong.

Psst! What did you get for the total credits?

AIRCRAFT MAINTENANCE TECHNOLOGY

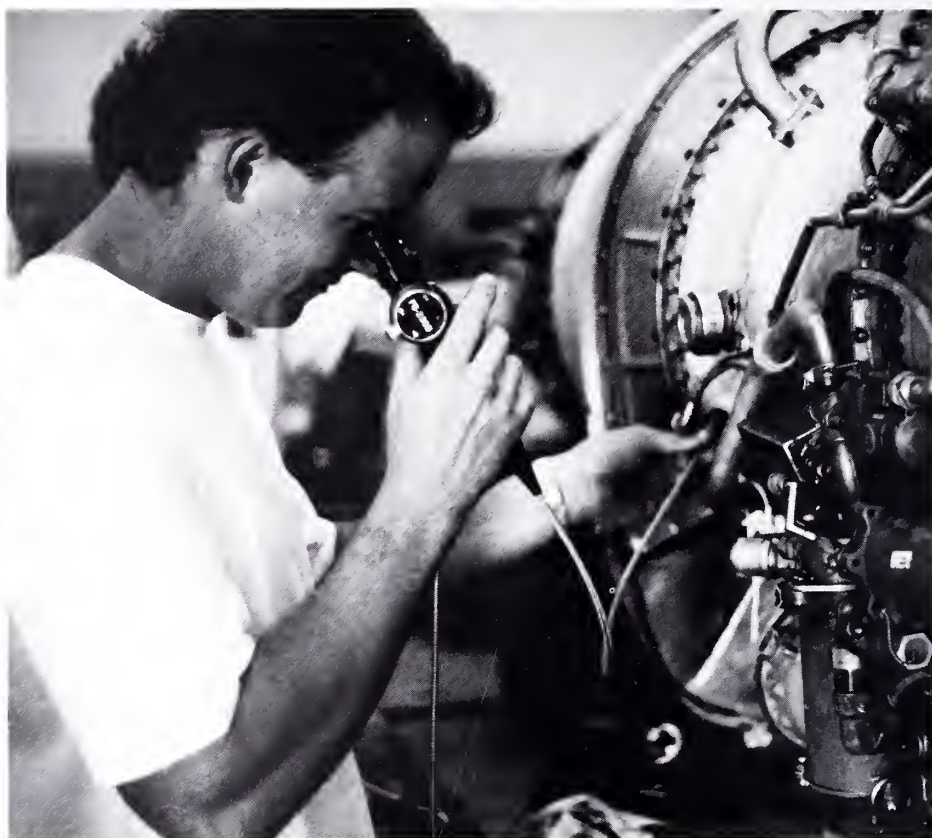

Man, this wheel is about to come off.

If you pull this back, we'll all be airborne.

There could be alot of uses for this little device.

I sure hope this thing doesn't fall.

AUTOMOTIVE TECHNOLOGY

Is this supposed to be this crooked?

I can't remember which wire goes where.

Why do I have to measure this thing, they all look the same to me.

I hope this rack doesn't fall.

CIVIL ENGINEERING TECHNOLOGY

How long am I going to have to hold this thing?

This is a great way to check out the women.

Just 2 inches short of a first down.

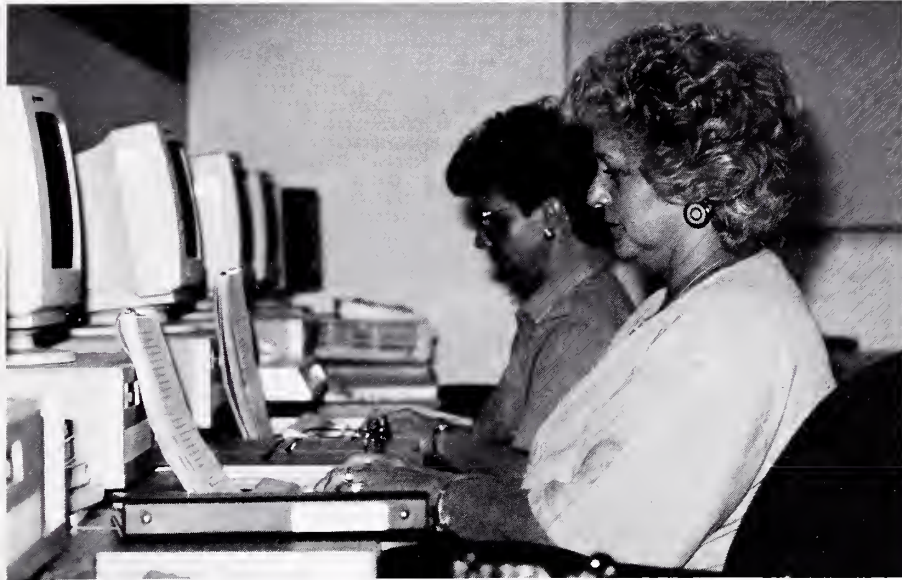

Wonder how many of these I can stack before they fall.

COMPUTER TECHNOLOGY

Now remember its ... ASDFJKL; space.

Do I put the paper in the top or the bottom?

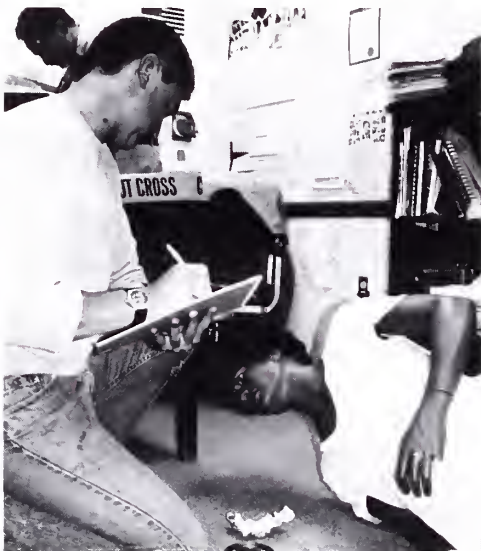

Four heads are better than none!

What does it mean when it starts printing Chinese?

CRIMINAL JUSTICE TECHNOLOGY

I'll find the crook who stole the final exam.

Help ... I've fallen and I can't get up!

This should keep Mrs. Griffin out of her office.

Deja-vu?

DENTAL ASSISTING

Gross ... Look what I found.

I hate doing dishes.

See ... there's a cavity.

Wow, I caught one!

DENTAL HYGIENE

Needs a little salt!

Gee ... your breath stinks!

Dental Hygiene students pass out free toothbrushes during break.

I think they will need braces!

DIRECT CARE SPECIALIST

This dumb woman won't breathe.

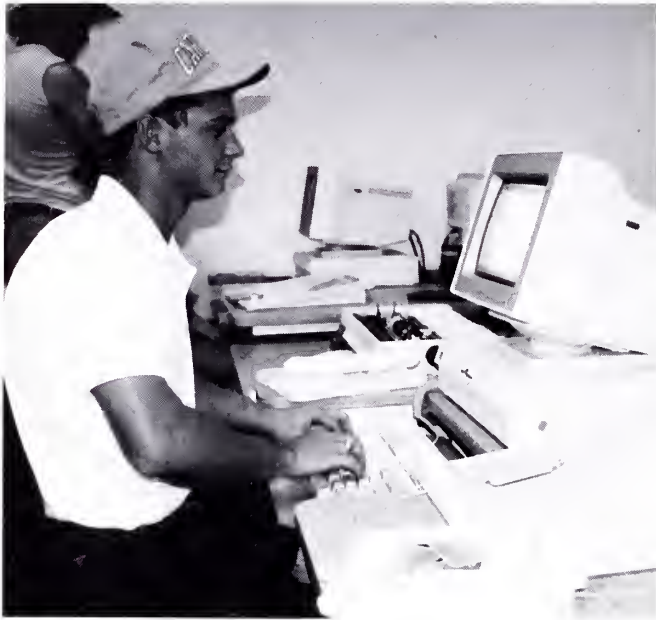

This scale has got to be wrong.

Tell my Mom I love her and ...

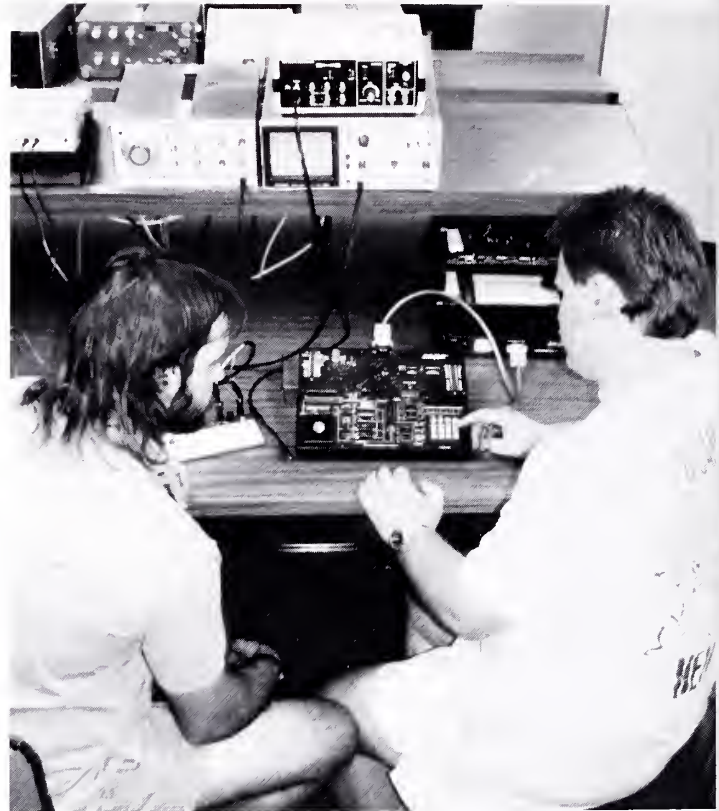

So how fast do you think this thing will go?

ELECTRONICS ENGINEERING TECHNOLOGY

What do you mean ERROR?

Let's try this one!

Now what ever you do . . . Don't touch this one.

ENGINEERING GRAPHICS TECHNOLOGY

How do you cut this thing off?

Gee ... I need to get glasses!

I thought we were going to get to color today!

You know you are not supposed to be drawing
dirty pictures.

FASHION MERCHANDISING

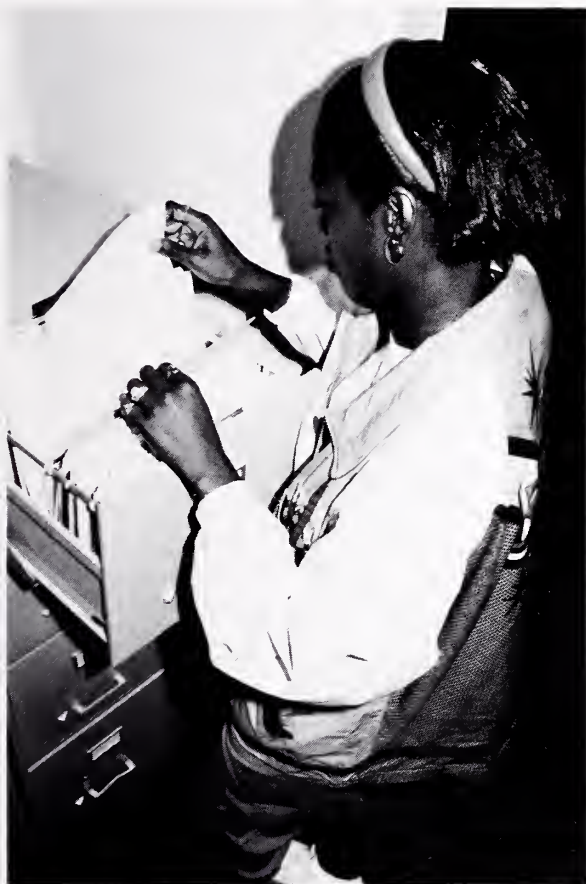

If you want a job done right . . . You have to do it yourself.

Stretch 2, 3, 4.

Charge it!!

GENERAL OFFICE

So this is the answer key to our final exam.

Where's the pause button on this thing?

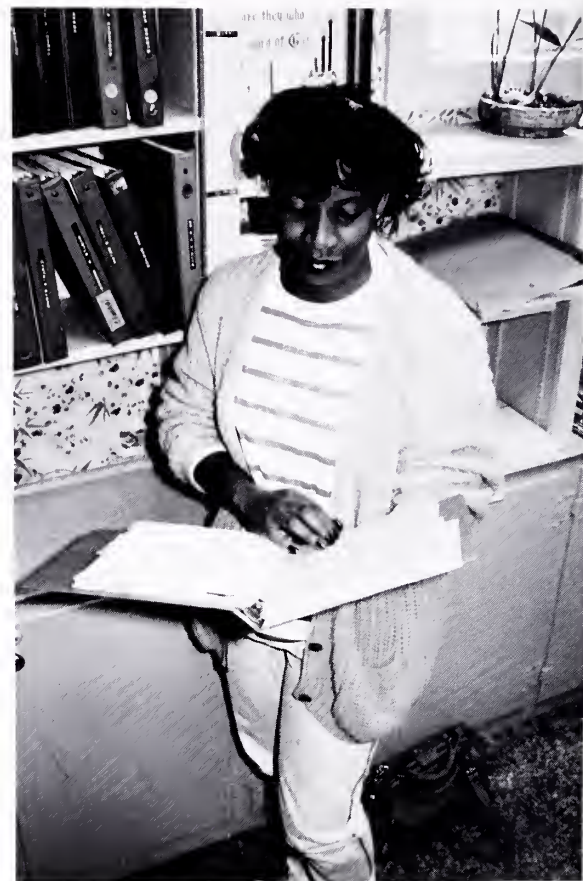

My fingers are so tired!

HEALTH CARE SECRETARY

The answer was right in front of your nose.

They never told me reading was part of the job.

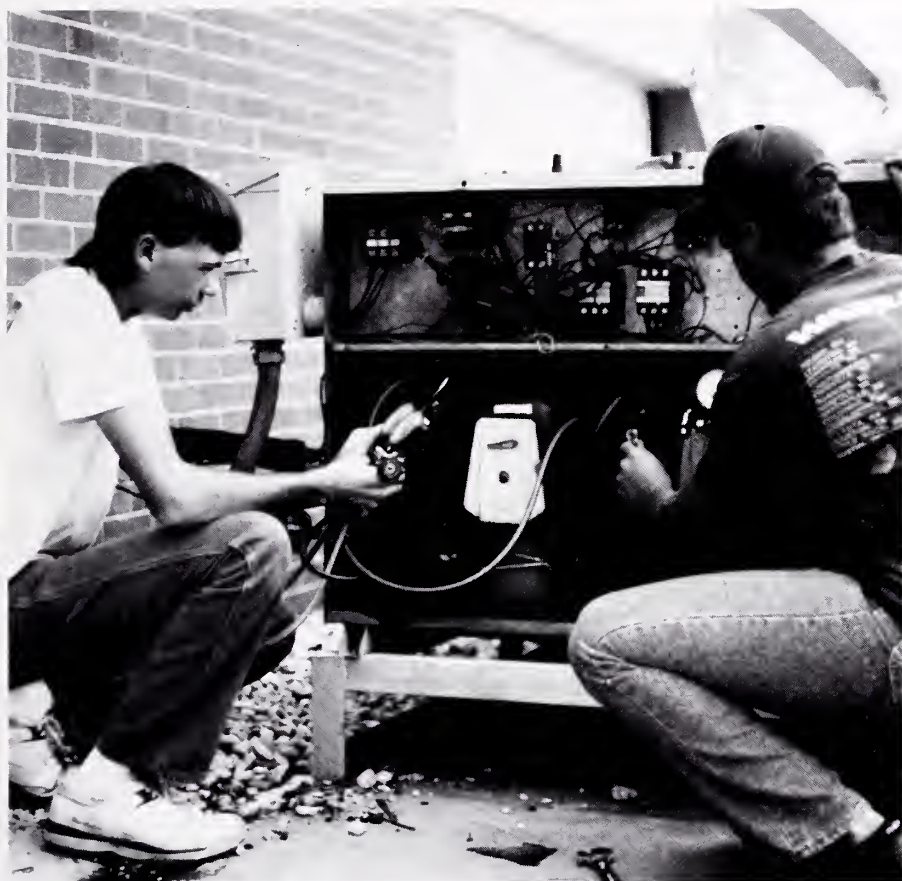

Smile, you're on candid camera.

HEATING, VENTILATION AND AIR CONDITIONING

Hands on experience aids in learning at FDTC.

This flame is too close to my finger

Which gauge do I read, the red or the blue?

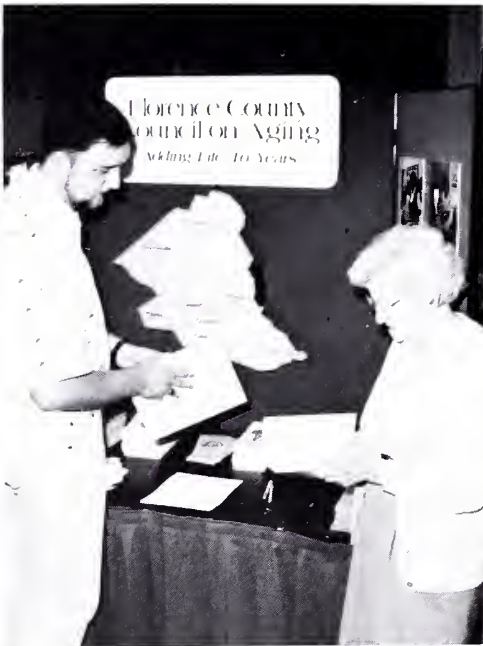

Need a light?

HUMAN SERVICES

I'm this many!

Human Services Students help in the rehabilitation of the elderly.

Grandma do you have to follow me everywhere I go?

Say what?

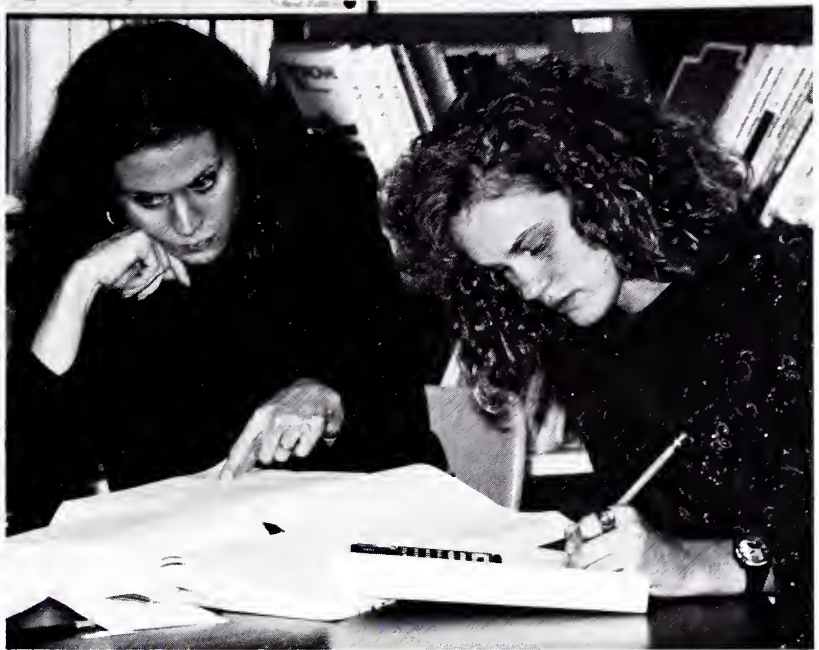

INDEPENDENT STUDY

Wow ... I got an "A".

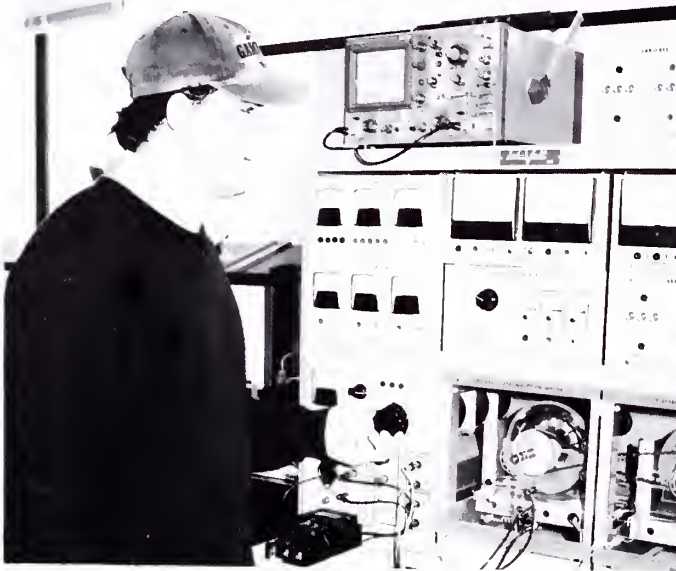

Many students go to the SAC Lab to get help from a tutor.

Maybe if we put our heads together we can come up with an answer.

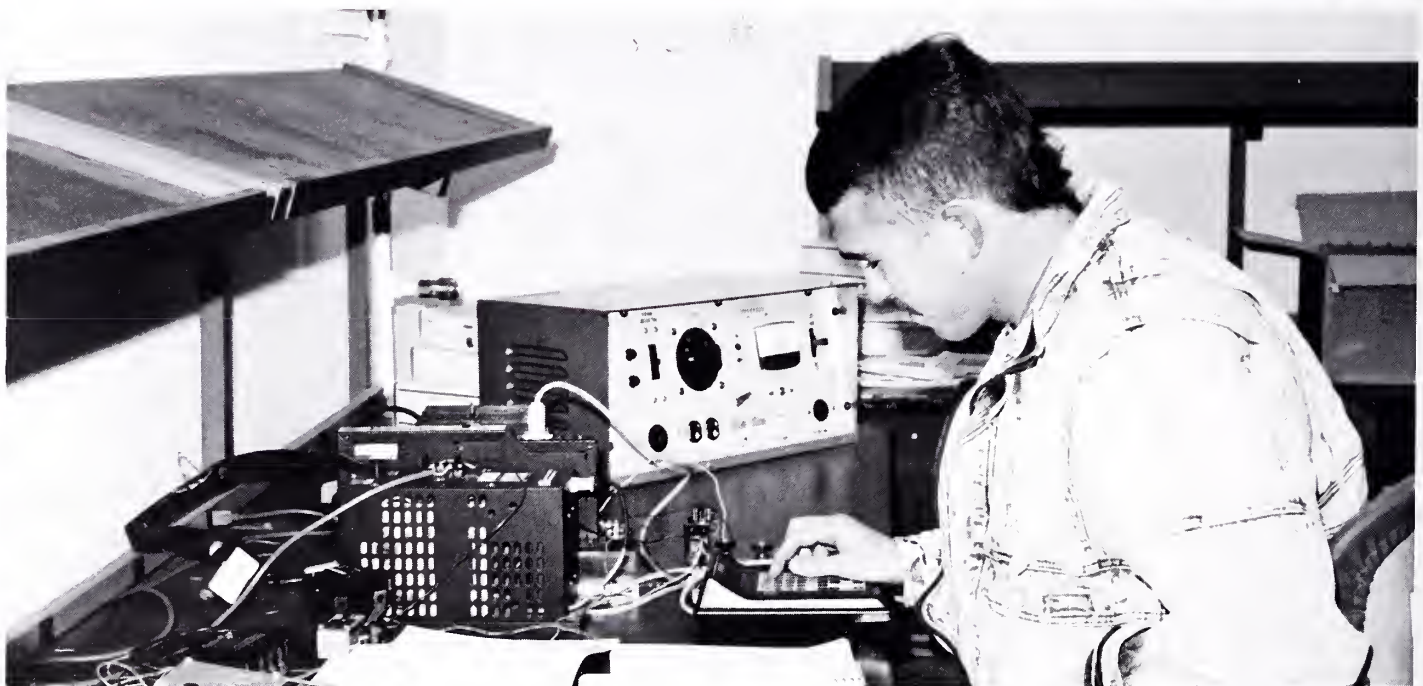

INDUSTRIAL ELECTRICITY/ELECTRONICS

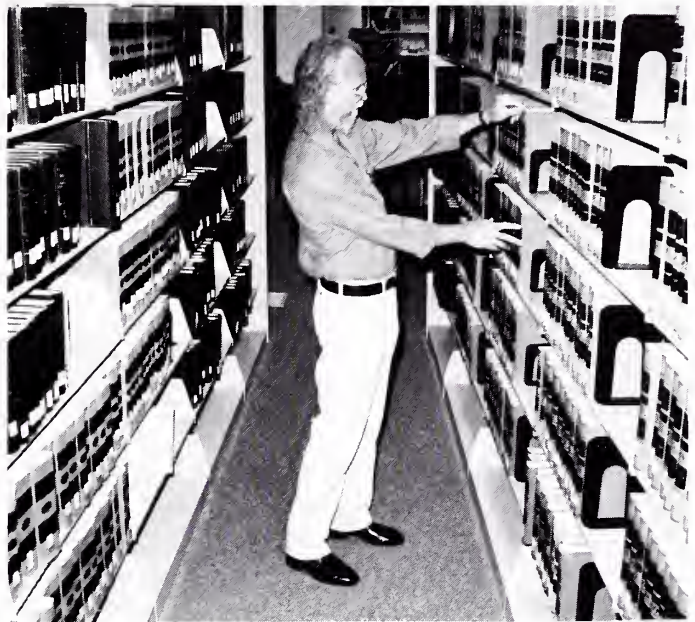

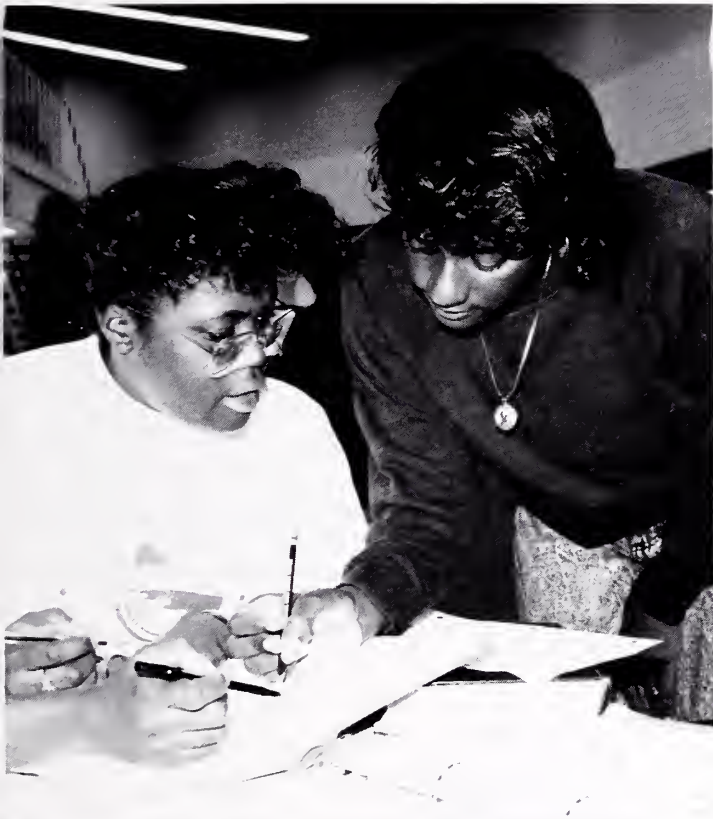

Don't touch that dial!

Hey ... want to help me get my motor going?

So many questions ... so little time!

LEGAL ASSISTANT

I can't believe she expects us to read all of these this quarter.

Why is he going to sue her for that?

The field of law requires endless research.

MACHINE TOOL TECHNOLOGY

Computers aid in the tool and die making process.

Drill press operation is learned by first year students.

Computers make measurements more precise.

Hands-on training!

MARKETING

When I graduate, I'll have one of these.

Mr. Foster spends a lot of time one-on-one with students.

I have company, I'll have to call you back in a few minutes darling.

MEDICAL LABORATORY TECHNOLOGY

I never thought a microscope would be necessary to examine my bank account balance.

I told you I could pull up my grades.

Mr. Quinn, don't look but you should feel a slight prick.

Greetings from the MLT class.

MEDICAL RECORD TECHNOLOGY

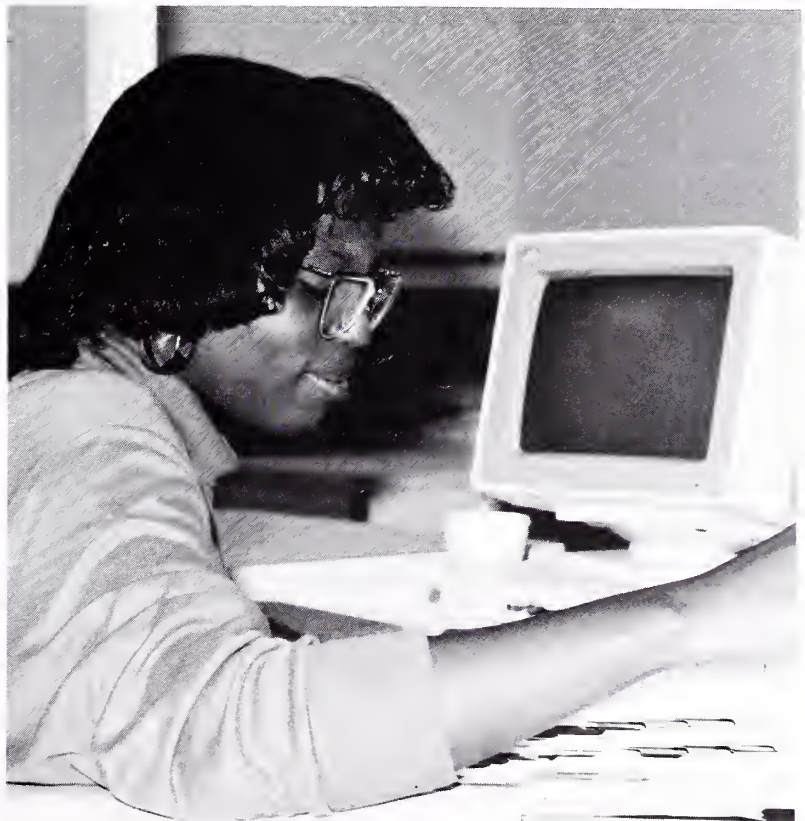

But I've already done it that way one time.

Aspirin, aspirin! How do you spell aspirin?

Student takes a break to lend the camera a smile.

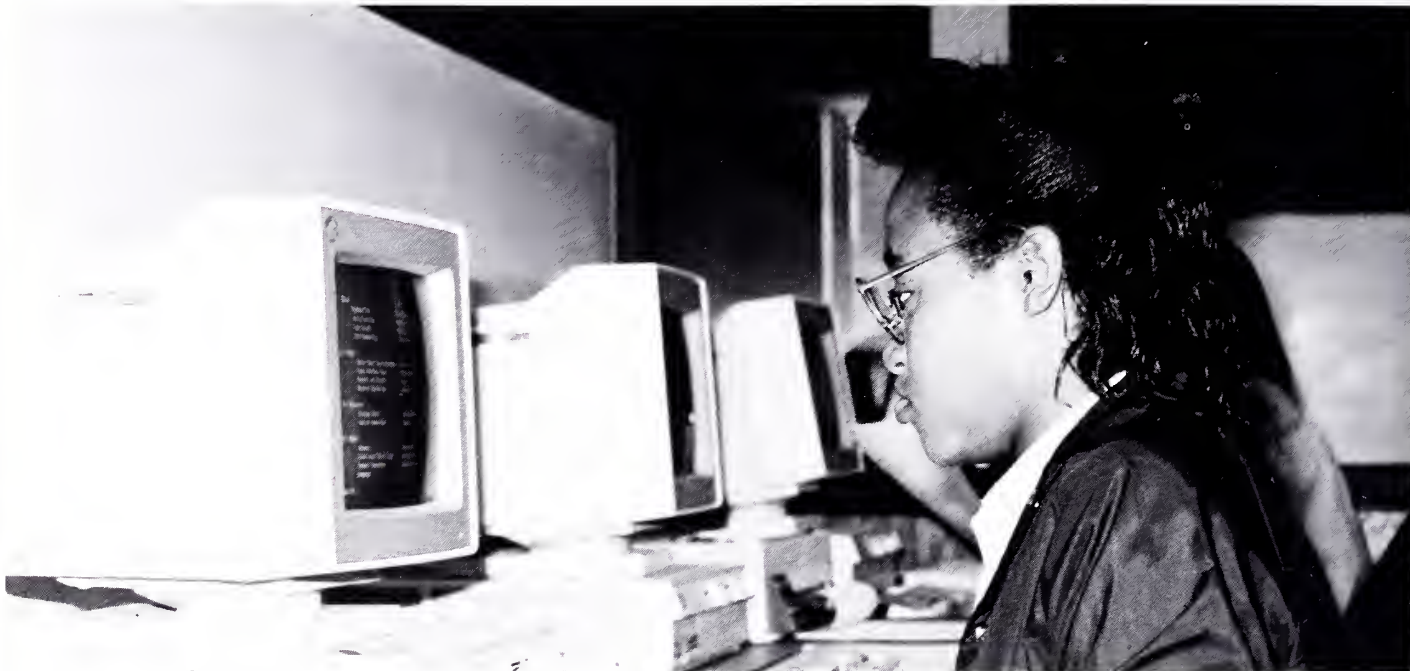

MEDICAL TRANSCRIPTION/WORD PROCESSING

Good typing skills are required to be successful.

Nothing like on-the-job training to perfect ones skills.

Proofreading is required when dealing with medical documents.

NURSING

All dressed up and in the hospital.

The stock market has gone up today.

Who's supposed to get this new bedpan?

I love to make those children holler.

OFFICE SYSTEMS TECHNOLOGY

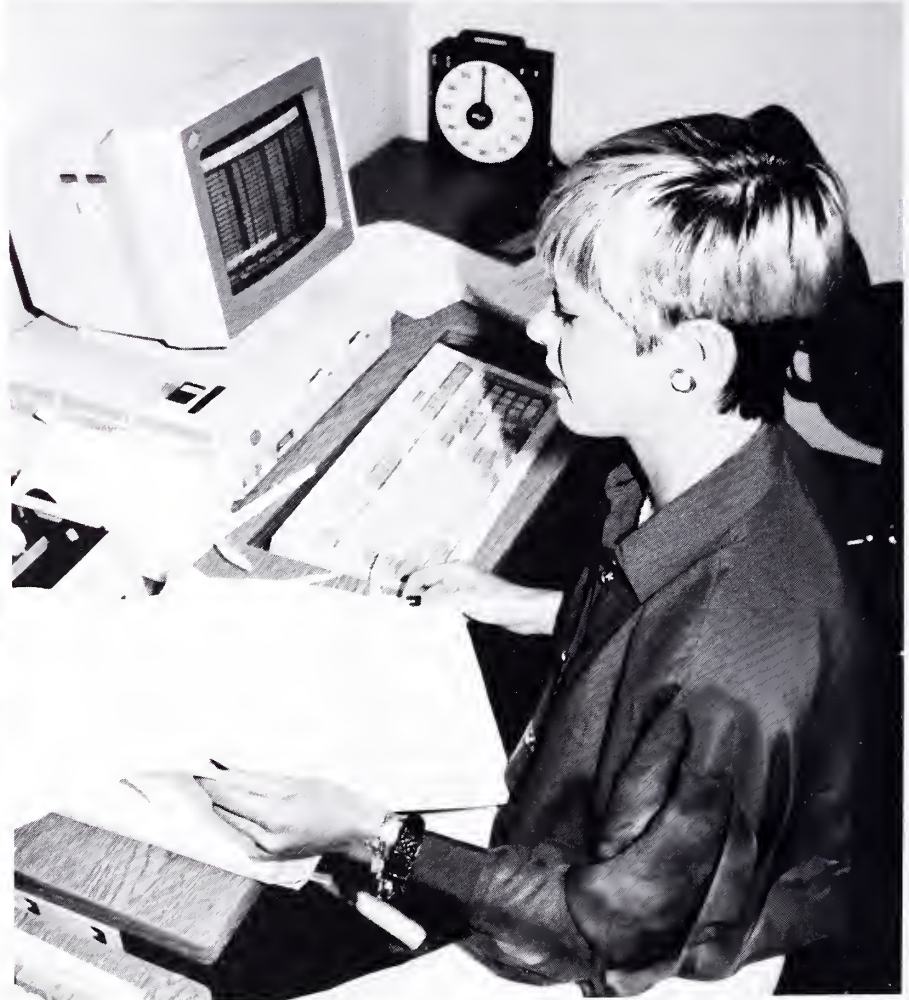

Even though studying is hard work, it pays off.

Are your cheatnotes in shorthand too?

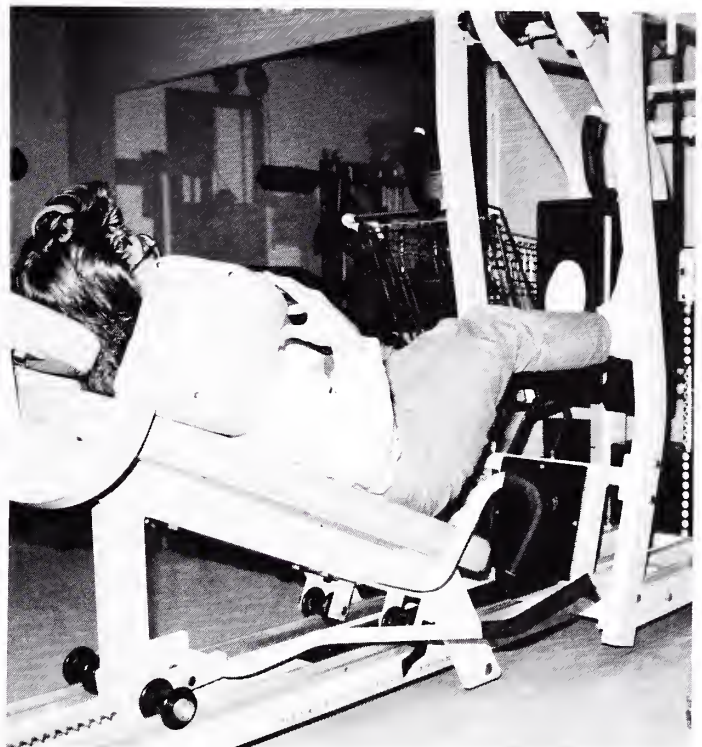

Where ever you go, *THEY* are always looking over your shoulder.

Stacy Cantley is always into something.

PHYSICAL THERAPY ASSISTANT

Stretch ... two ... three ... four.

My prerequisites said nothing about getting in shape.

At Tech you have to take it one step at a time.

Who me? Just hanging around.

RADIOLOGIC TECHNOLOGY

Operating a CT Scanner requires a lot of training.

All this work and no pay.

Ready, aim, launch!

Examining and labeling X-rays is all in a day's work.

RESPIRATORY THERAPY

Which button did Mr. Evans say push?

A Super Duper Balloon Inflator.

Respiratory assistance can require fine tuned adjustments.

Tech's Time Capsule

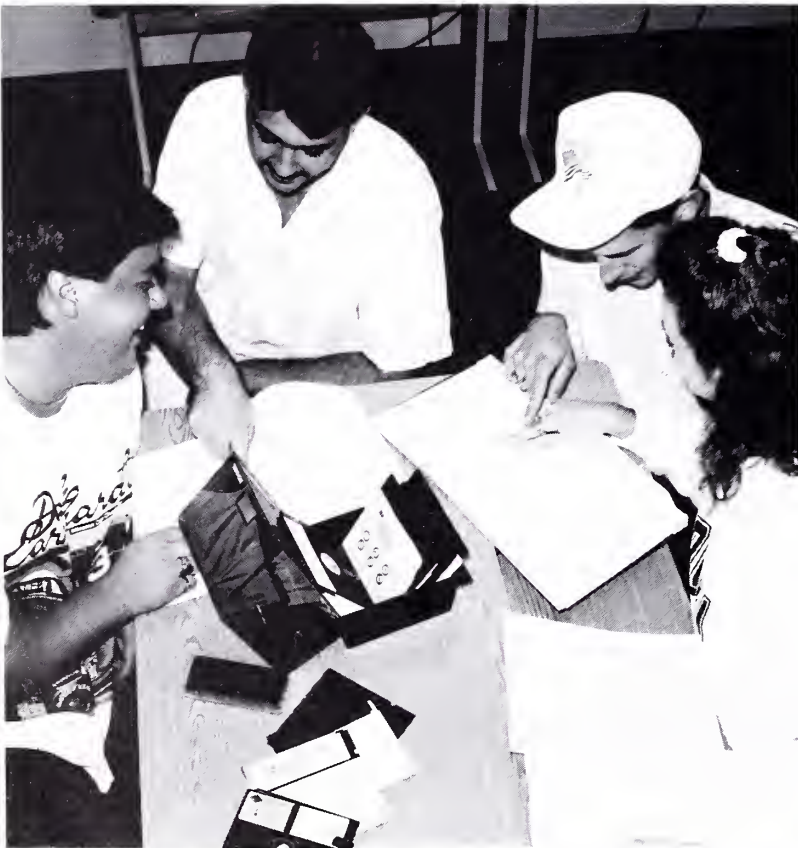

SMALL BUSINESS MANAGEMENT

Computers play a vital role in business training.

What do all of these numbers mean?

Study groups aid in learning.

SURGICAL TECHNOLOGY

Surgical Techs must learn to identify certain tools on sight.

Wonder why Ms. Coleman wrapped these brownies for baking.

Surgical Techs train on mock operation situations.

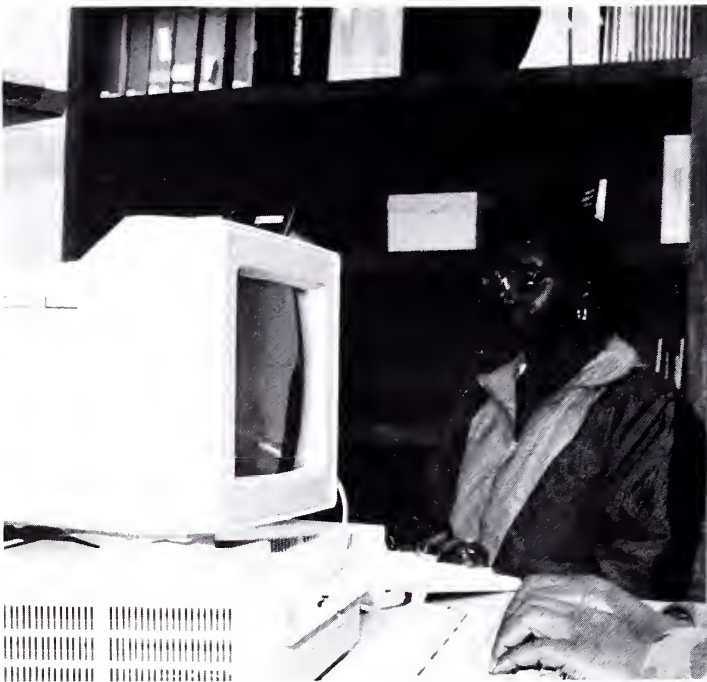

Did the report say to remove the right one or left one?

TRANSITIONAL STUDIES

You never said I would have to help you type my paper.

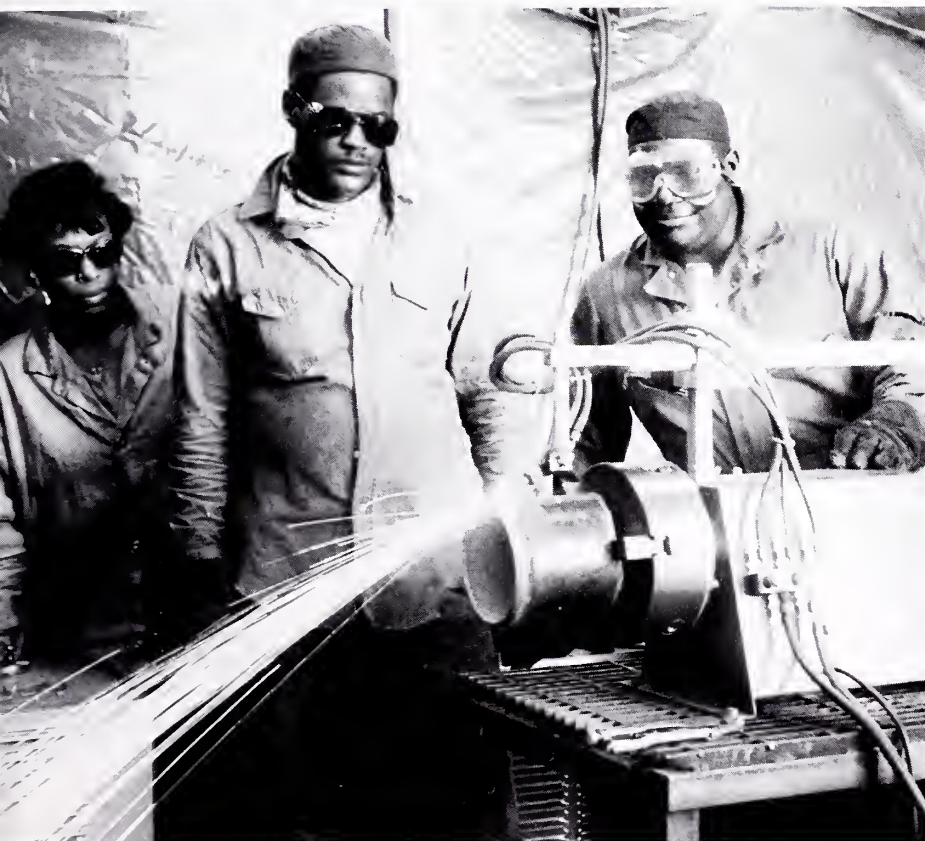

I sure wish I had learned how to do this in high school.

I'll be glad when the school gets more games for these computers.

WELDING

Tech students learn the skills of pipe welding.

This ought to hold that wheel on.

Precision pipe cutting.

Close-up welding.

CONTINUING

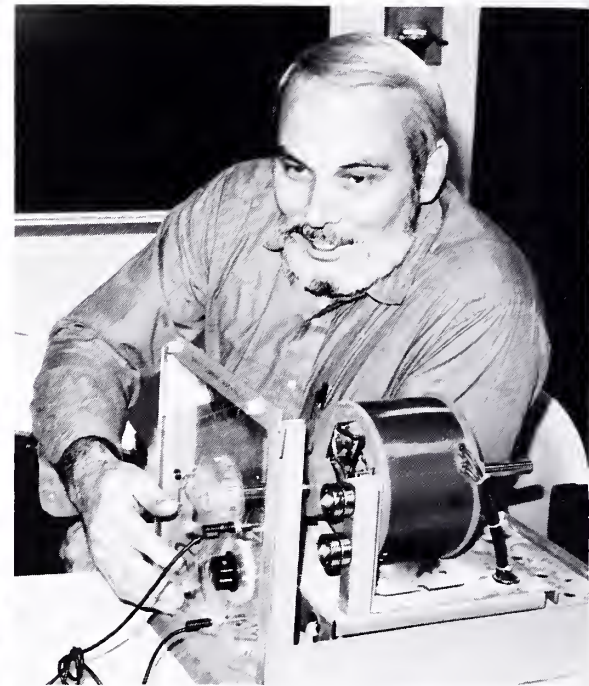

Welding Certification.

Using a track torch.

Dog Grooming.

Electricity/Electronics.

YEARBOOK STAFF

This is my last quarter at Tech so I would like to say thanks to a few people. The first being Fred Salley, you opened my eyes to nature and taught me the value of being all one can be. The next being Debbie Langston, you gave me the ability to laugh at myself and shared with me the power of optimism. Dr. Sherfield, you made me dream about the future, cautioning me to never (ever) look back, that the sky is my limit! And last, but never least, to all my friends. You make me laugh when I feel like crying and cry when I feel like laughing. You have touched my life in various, constructive ways. I will always be grateful for your enriched blessings.

Thank you all!

Keesha Rollings
Editor

My desk is finally clear of hundreds of photographs, layout sheets, copy sheets, page envelopes and deadline dates. By now, Kate and I are out lying in the grass enjoying the sun.

My most sincere gratitude goes out to many people for making this yearbook possible. Thanks to Keesha, Kim, Wanda, Kevin, Gigi and Jerre for a lot of hard work in drawing layouts, sorting pictures, and writing captions. The faculty will never know how I appreciate them for letting me interrupt class and projects to take pictures you see contained within the academic section. I am especially grateful to David V. Barr and Dr. Michael B. McCall for giving me the freedom to act on my judgements in the development of this publication. As always I am thankful for Debbie Langston's help, not to be limited to the typing of every word in this yearbook. I hope this yearbook makes us all proud to be a member of the Tech family.

Enjoy,

Fred Salley, Jr.
Director of Student Activities
